GSE300977 | Positional structure across spatial states

A-C Prespecified secondary scan D Post-reveal common-anchor sensitivity

Shading: pointwise 95% bootstrap intervals; not multiplicity-corrected.

Dotted line: frozen +75-nt primary position. No secondary center is promoted to primary.

A-C use center-specific eligible units; D uses the same 3,510 anchors at all 11 centers.
